

Root Barrier Solutions

Project Managed Design and Installation Service

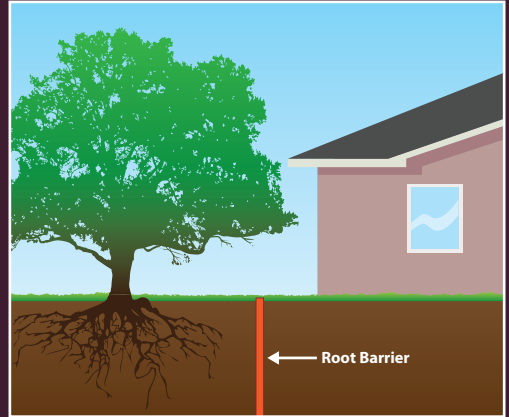

"The root barrier was installed by MWA Arboriculture with impressive efficiency. Fencing, stonework, lawn and garden shrubs were carefully protected and all restored to their original state. I have no hesitation in recommending this company to undertake similar installations".
Mrs Sandor, Essex

Root Barrier Solutions

Project Managed Design and Installation Service

Root barriers offer a potential alternative solution to tree removal or underpinning in subsidence damage claims.

MWA has over 10 years' experience in the successful planning, design and installation of root barriers. Our consultancy team work closely with engineers and other project managers to prepare an appropriate design. Our in house ground works team draw upon many years of experience and expertise to ensure successful installation ensuring an effective long term solution.

Benefits:

- Speeds up claim resolution
- Cost savings over underpinning
- Reduced impact on the homeowner
- Effective long-term solution
- Local amenity is preserved
- Reduced environmental impact

We offer:

- Full design, supply and installation service
- National coverage
- Free initial desk top feasibility study
- Qualified Arboricultural expertise
- Highly experienced installation team
- Negotiation with 3rd parties and Local Authorities
- Statutory control applications
- Focus on customer satisfaction
- Effective Health and Safety management
